

## MINUTE SHEET

Case No: AIT/COMP/

Sheet no:

### REMBURSEMENT OF VALUE-ADDED COURSE FEES

1. Every year, students pay the value-added course fees in their academic fees.
2. **Samir Game** is from the TE-COMP-B; he attended course on <https://rohittnegi.akamai.net.in/> online learning platforms.
3. Details of the courses attended and the amount required for the course have been attached under **Flag "A,"** and Completion Certification have been attached under **Flag "B."**
4. **The Course Details are as follows:**

| Sr. No. | Course Name                                                                 | Amount |
|---------|-----------------------------------------------------------------------------|--------|
| 1       | Web Development + Block Chain + System Design+ Data Structure and Algorithm | ₹ 4410 |
| 2       |                                                                             | ₹      |
| Total:  |                                                                             | ₹ 4410 |

5. I request you to reimburse the registration costs to the account attached to **Flag "C."**
6. The amount is to be refunded from his value-added course fees that were paid.
7. For your approval please.

Mr. Samir Game  
(TE COMP Student)

Dr. Vaishali Ganganwar  
Coordinator

Prof. Kuldeep Hule  
T&P coordinator

Prof. Rushali Katkar

# **Course Details**

**Course Name:** Web Development + Block Chain + System Design+ Data Structure and Algorithm

**Platform:** <https://rohittnegi.akamai.net.in/>

**Instructure:** Rohit Negi

## **Modules Covered**

1. Data Structures & Algorithms (C++)
2. MERN Stack Development: React JS, Node.js, and Express JS.
3. Modern Web Tech: TypeScript, WebSocket's, WebRTC
4. Blockchain Fundamentals
5. Web3 Development: Solidity, Rust
6. System Design Foundation: CAP Theorem, Monolith vs. Microservices, Load Balancing, and Consistent Hashing.
7. Scalability & Performance: Caching strategies, Database Sharding, Messaging Queues, CDN.
8. Deployment & Security: Authentication/Authorization (JWT), Cloud deployment, and building end-to-end production-ready projects.

## **Key Skills Gained:**

JavaScript, Typescript, React.js, Node.js, Express.js , NoSQL, Redis, Rust, Solidity,

System Design, Blockchain, WebSocket, Docker
